TEACHERS HERE FOR CONVENTION

Advance Guard of State Pedagogues Reached Salt Lake During the Day.

DR. HALL AMONG ARRIVALS.

Reception Tonight, Visit to City Schools Tomorrow and Lecture Tomorrow Night.

The trains today brought in the advance guard of teachers for the annual convention. Indications are that the general session tomorrow evening. at which Dr. G. Stanley Hall will deliver his first address, will be attended by at least 1,200 county teachers, and that the convention as a whole will be attended by a larger number than ever before in the history of the state.

The plans for tonight's reception and tomorrow's visits to the schools, as well as for the department meetings, have all been perfected. Dr. Hall arrived this morning over the Rio Grande Western, and went to the University club, where a lunch was arranged for him by President Cummings, State Su-perintendent Nelson, City Superintend-ent Christensen, Principal Oscar Van Cott and a number of other well known teachers.
This evening, following the reception

to the teachers, President Cummings will deliver his annual address, and dancing will be enjoyed, as well as light

FREE BOOKLET ON BRIGHT'S DISEASE AND DIABETES.

We desire to place in the hands of those afflicted with Bright's Disease or Diabetes a 35-page pamphlet that is saving human lives. It is not an ordinary pamphlet, but is principally made up of reports of scientifically conducted tests in a large variety of cases, showing 87 per cent of recoveries in these hitherto incurable diseases.

This bookiet is for thoughtful people—people who can discriminate between common patent medicine literature and a carefully prepared report of a patient, serious and profoundly important investigation.

The specifics employed in these tests are known as the Fulton Compounds and the results obtained prove conclusively that these dreaded diseases so long fatal have at last yielded to medical science. The pamphlet is free, F. J. Hill Drug Co., Local Agent, Sait Lake.

When to suspect Bright's Disease—wakness or loss of weight; puffy ankles, hands or cyclids; kidney trouble after the third month; urine may show sediment; child month; urine may show sediment; lalling vision; drowsiness; one or more of these.

In Diabetes the distinguishing feature is, weakness with great thirst and at times you could be supported.

Cheated Death.

Cheated Death.

Kidney trouble often ends fatally, but by choosing the right medicine, E. H. Wolfe, of Bear Grove, Iowa, cheated death. He says: "Two years ago I had Kidney Trouble, which caused me great pain, suffering and anxiety, but I took Electric Bitters, which effected a complete cure. I have also found them of great benefit in general debility and nerve trouble, and keep them constantly on hand, since, as I find they have no equal." Z. C. M. I. Destitute Family Supplied With Food Shelter and Clothing.

A sad case of destitution was discovered Saturday evening, by Rev. P. A. Simpkin on State street, between Fifth and Sixth South street. John Reilly and his wife and seven children were found in a tent without food or coal, and the father was suffering from pneumonia. They had traveled from Kansas to the Uintah reservation last summer, in hopes of drawing a claim for settlement, but being disappointed. they remained on the reservation until driven out by hunger. The family came to this city in a prairie schooner, but on the way Rellly was taken sick with pneumonia, and but for the appearance of Mr. Simpkin he would have died, Mr. Simpkin and Supt. Woods of the Associated Charities had the family re-moved to more comfortable quarters on Washington avenue, where medical attention was secured for Reilly, and food and fuel for the household, with suffi-

Man Who Mas Been Robbing Rooming Houses Now in Custody.

Detectives Shannon and Raleigh have finally secured the man who has been robbing roominghouses. The fellow is believed to be a desperate crook, and it has been proved that he escaped twice from California prisons. The name of the priscner is Glen Blood, alias A. G. Harri-

prisener is Glen Blood, alias A. G. Harrison alias Fred Grant.

In appearance the prisoner looks to be a mere boy, but it is claimed that he is 25 years of age. Through the constant efforts of the officers. Blood has confessed that he has been burglarizing various rooms. Recently he sneaked into a room occupied by two Italians, secreted himself under the bed and while the Italians were asleep, Blood robbed them of 18 and two fine gold watches. The watches were found on him when he was searched at the police station.

It was learned that Blood was serving a six-year sentence for burglary at the lone industrial school in California. He escaped and went to Oakland but was captured and returned to the school.

He was then shackled to a post in his room, but managed to break the chain, rob a sleeping guard of a watch and escape to Tonopah. There he was again arrested for burglary and was in jali about 10 days when he escaped and came here. As soon as the authorities are through with him here he will be taken back to California.

GREEKS ARE GOING TO NATIVE LAND.

Many Thousands Will Soon Return to Witness the Famous Olympic Games.

THOUSANDS RESIDE IN UTAH.

Passing of Special Law Makes it Easy To Go Home Now-The Rigid Military Requirements.

Special Correspondence. Butte, Mon., Jan. 1.-It is known that this coming spring and during the month of April, 1906, at Athens, Greece, will be held the famous "Olympic Games" for which the Grecian government has been at great pains to revive, so that the ancient glory of Greece from an athletic point of view, may again be seen. The approaching festival is one of the results of the efforts, backed by private contributions from wealthy Greeks. The present idea is to hold these games every four years, both with the nope of interesting the youth of the country in amietic pursuits, and reviving interest in olden times and scenes that have been famous for centuries.

CONSULS ALL AT WORK. Besides the Grecian government's work, it seems that all the Greek con-suls in the United States are energetic and working very hard for the good of their country, so as to obtain from the rangon and steamship companies an excursion rate, and here is how it started: George N. Tsolomiti, vice consul for Greece in Butte a month or two ago, approached the officials of the Northern Pacific Railroad company in this city, to whom he explained all about the famous "Olympic games,"

also that there are several thousand Greeks in this country who are going home to serve in the national army, and, for which explanations are made.

EXCURSION RATES. In the meantime he suggested to the officials and urged them in a kindly way of taking up the matter with their headquarters, proposing for an excursion rate from America to Greece in favor of the Olympic games, also for the many Greeks bound to go home. The eastern railroad and steamship companies found the vice consul's position all right, and now are figuring about the excursion's rates.

So, if the efforts being made by the vice consul of Butte, who is working together with the eastern Grecian consuls for the excursion rates, is suc-cessful, there will be many thousands of Greeks to take advantage of it to go home and square accounts with their government.

RIGID MILITARY LAW.

The law of Greece is that every male citizen between the ages of 21 and 51 years is subject to conscription and must serve in the national army from ne to three years, according to the lot he draws.

Many thousands of young Greeks left their native land to avoid military duty, and by that act made it impossible for them ever to return to Greece.

Last summer the ministry and cham-ber of deputies, realizing that the young men of Greece were emigrating young men of Greece were emigrating too rapidly, passed a law proviling that all male citizens subject to military duty between 1893 and 1903, who were not in the kingdom of Greece to serve their terms, might return and squar accounts with their country by serv ing three months in the army and pay-ing into the national treasury 600 drachmas, equal to about \$120. The law is in effect now.

RESTORED TO FULL RIGHTS.

All those taking advantage of it will All those taking advantage of it will be restored to their full rights as citi-zens and thereafter will be exempt from all military obligations. There are in the United States about 70,000 Greeks, and of that number fully 20,-000 are subject to the new law. It is believed that a large majority of them will go back to Greece, pay their fine, take their three months in the army as a vacation, see the Olym-pic games, and return to the United States with a clear conscience and light hearts.

Greeks cannot avoid their obligations to their country by taking out natural-ization papers, because naturalizations are not recognized in Greece unless a royal decree and permission to fore-swear allegiance to the king of Greece is first obtained, and such permission can only be obtained by a person who has fulfilled his obligations to his coun-

SITUATION STILL SERIOUS.

No Immediate Prospect of Overcom ing Scant Coal Supply.

There are no immediate indications of an improvement or an increase in the coal supply of the city, and the shortage is still causing considerable annoyance to the small as well as the large consumers. All of the dealers are from five to ten days behind in their orders and some of them worked their haulers Sunday and yesterday in order to relieve the situation as much as possible. Unless conditions improve soon some of the other retail dealers will have to follow the example

set by one dealer and refuse to accept any more orders and use what coal they can secure to fill the orders on hand. It is claimed that the raliroads are now furnishing all of the cars needed but the output of the mines can not meet the demands of the consumers. Some dealers claim that the failure of consumers to lay in a supply of coal tast summer has a great deal to do with the shortage at the present time. Usually, during the summer months, the dealers make a special rate to retail dealers and large consumers to induce them to lay in a large supply of coal, but it seems that no such inducement was made last summer and the result was that the mines did not run full shifts or full time during the summer. The mines let dut a number of their men who sought other jobs and when the big rush came they were confronted with a shortage of men as well as of cars. To this state of affairs may be attributed, to a great extent the cause of the present shortage of coal.
